Re: Alabama handbook for Erosion Control, Sediment Control and Stormwater Management on Construction Sites and Urban Areas

We are replacing all of Volumes 1 and 2 of the subject Handbook **except the Appendix** with the new March 2009 material which is provided with this package. Retain your existing Appendix which should be in either your existing Volume 1 or 2 (your choice).

The material enclosed in this shrink-wrapped bundle is for your Handbook Volume 1. Remove the old material except divider tabs and the Appendix and place the new March 2009 contents in the appropriate sections of your Volume 1 binder. The colored sheets divide the materials for your convenience in placing the appropriate material behind divider tabs. Retain your Appendix material in a binder containing either Volume 1 or Volume 2.

Vertical lines indicate significant changes in the contents of the revised material.

Let me know if there are any questions about the changes.
